Imagine visually presenting financial information, company updates or benefits plans to investors or employees without having anyone leave the office. From spur-of-the-moment meetings to that important Event Call or Training Session, InterCall's complete range of web conferencing solutions makes it easy to share information via the Internet with any size audience, anywhere, anytime.

Conference PlaceSM

With its flexible platform and configurable user interface, Conference Place, powered by Microsoft® Office Live Meeting, can be optimized with the features that best fit the type of meeting you're conducting. From small, collaborative working sessions to large online presentations, Conference Place makes it easy for you to present and for your participants to benefit from the web conference no matter what size the group. With features like Audio Controls, custom slides, reporting tools, recording options and Print to PDF you can make Conference Place the perfect match for any meeting. Use Conference Place for company-wide events, project status meetings, product launches or even virtual sales presentations.

Mshow[®]

Mshow's premium event platform allows you to use the web to extend the reach of your ideas to virtually anyone in the world. During your Mshow event, you'll have access to a variety of features that will help you create an engaging and memorable experience. Capture your audience's attention by including animation, embedded video, audio and Flash media. The slide presentation feature will help you construct a full multimedia event and deliver it smoothly to participants regardless of their computer or Internet speed. All features are easy to use and help deliver a high impact event. With all this and our available custom content creation resources, Mshow makes it easy to turn your ordinary conference into an extraordinary online event.

MeetingCenter[™]

MeetingCenter, powered by WebEx[™], provides the ultimate collaborative platform for your day-to-day communication needs. Whether your daily business is conducted internally with colleagues or externally with customers and vendors, MeetingCenter provides the ideal online setting to do so effectively. Receive immediate feedback from your participants with the Polling feature. Collect financials and review data easily through Document Sharing and file transfer. See who's talking via multipoint video conferencing. PowerPanels[™] and the Floating Icon Tray allow you to customize your view of the meeting and easily access the tools that you need. You can even control your Reservationless-PlusSM audio conference from within the MeetingCenter meeting

interface so your attention remains focused on your meeting rather than switching back and forth between your computer screen and your telephone keypad.

TrainingCenter

TrainingCenter, powered by WebEx, allows you to deliver live, interactive training to employees, partners and customers anywhere, anytime through a standard web browser. With TrainingCenter you can share presentations, documents, applications, web browsers and your desktop with learners during a training session. And with features such as testing and polling, the ability to break large groups into smaller work groups, recording and reports and Reservationless-Plus audio controls — you'll quickly see all the benefits TrainingCenter has to offer. Bring the training to your learners while significantly reducing training delivery costs — all using TrainingCenter web conferencing.

EventCenter™

EventCenter, powered by WebEx, provides everything needed to deliver cost-effective and successful online events – from event planning and promotion, to delivery and post-event follow up and campaign reporting. With EventCenter, you can deliver many compelling webinars or online events for less than the cost of holding just one on-site. Features like custom email invitations, lead scoring and presenters' prep room can help your online event run smoothly from start to finish.

SupportCenter

SupportCenter, powered by WebEx, provides all the tools to make your Technical Support Representatives (TSRs) as efficient and effective when working remotely as they would be on-site. With SupportCenter, TSRs can view, diagnose and solve customer problems online. Customer files can be transferred for off-line analysis or, with permission, the TSR can actually run the customer's desktop and download patches or updates to the customer's computer. Your customers get fast, intelligent support without having to endure multiple calls to diagnose simple issues.
